1. Introduction

The Financial Markets Conduct Act 2013 (FMC Act) and Financial Markets Conduct Regulations 2014 (FMC Regs) aim to promote the confident and informed participation of businesses, investors, and consumers in the financial markets, and to facilitate the development of fair, efficient, and transparent financial markets.

The FMC Regs require fund managers to produce quarterly fund updates (and annual fund updates for managed fund offers in a restricted scheme).

This guide is for managers of managed funds and clarifies how fund data should be prepared and uploaded to the Disclose Register. It outlines the options for delivery of data, file formats and data requirements.

High-level process for registering managed fund offers

Contact the Disclose Register team

If you have any questions about the processes outlined in this guide, please contact the Disclose Register team:

- Phone **0508 377 746** (international callers **+64 3 962 6162**)
- Email info.disclose@companies.govt.nz

Contact Financial Markets Authority

If you have any questions about interpretation of the FMC Regs, please contact the Financial Markets Authority:

- Website www.fma.govt.nz
- Phone **0800 434 567**

2. Options for providing managed fund data

There are two ways to provide managed fund data at registration and for regular compliance events:

Uploading data into the register

Data is uploaded per fund into the Disclose Register using standard templates. The general funds data is populated into fields, and the fund returns and full portfolio holdings files are displayed as uploaded documents.

Using Application Programming Interfaces (APIs) (web services)

Application Programming Interfaces (APIs) (web services) are technical interfaces that allow your system to talk directly to the Disclose Register and send and retrieve information automatically.

If you're interested in using APIs, please visit [API Explorer](#) for information including help and support.

[Download managed fund data templates from the Disclose Register website](#)

3. Data formatting requirements

There are three templates for your managed fund data. We provide the templates in either CSV or Excel (XLSX) formats.

The templates are:

1. General fund data template (containing data required under cls 53(1)(a) to (i) Sch 4 FMC Regs) [\[XLSX 40KB\]](#) or [\[CSV 4KB\]](#)
2. Fund return data template (containing data required under cl 53(1)(k) Sch 4 FMC Regs). [\[XLSX 141KB\]](#) or [\[CSV 1KB\]](#)
3. Full portfolio holdings data template (containing data required under cl 53(1)(j) Sch 4 FMC Regs). [\[XLSX 197KB\]](#) or [\[CSV 1KB\]](#)

Important:

The format and version of your CSV or XLSX data file must match exactly the templates on our website, and your data must comply with certain data rules as defined in section 4. If you enter data that isn't compliant, or alter the template in any way, you'll get validation errors when you try to upload the template.

Using the templates:

You can:	You can't:
Extend the number of decimal points from 2 to 4 for these fields if you wish: <ul style="list-style-type: none"> • Actual investment mix %. • Top ten investments - % of fund net assets. • Full portfolio holdings – % of fund net assets. • Weekly fund returns %. 	<ul style="list-style-type: none"> • Delete unused cells or rows. • Add cells, columns or rows. • Add additional tabs to the templates. • Reconfigure the order of information in the templates.
Add notes outside the defined cells. Notes won't be transposed into the register for the general funds template.	Add commas to <i>Number of investors</i> . The register will format with commas.
	Remove defaulted currency code (NZD) even when not providing a fund value.

General data conventions:

Data types	Description
Dollar values	Enter data as a number without a dollar sign – e.g. enter 10.00 not \$10.
Percentages	Enter data as percentage – e.g. if the required value is 5.00% enter 5.0 rather than 0.05. For percentage values less than 1%, ensure you provide a leading zero before the decimal e.g. enter '0.1' rather than '.1'
Country code	This must conform to ISO country code standard ISO 3166-1 alpha2.
Currency code	This must conform to ISO currency code standard ISO 4217.
Maori macrons	Māori macrons can't be saved in a CSV file. Anyone wanting to specifically use macrons will need to import from an XLSX file, otherwise use standard letters in your CSV file.

Other help available on the Disclose Register website

- Refer to the [Key Legislative References guide](#) for more information about the register entry fields for managed funds and the key legislative references relating to those fields.

4. Description of data in templates

These tables are a guide only; please ensure you provide all data required for your fund according to the legislation.

General note:

- A **fund** number will only be allocated after the offer has been accepted by the Registrar of Financial Service Providers. Leave the fund number field empty if adding a new fund.
